

Dashboard

Our platform tracks overall community growth metrics of all major social channels (Facebook, Twitter, Youtube, Medium, Reddit, BitCoinTalk.org ANN) as well as engagement metrics of individual posts inside each channels. Visualize overall community reach and engagement using informative charts.

Campaign Timeline

Review marketing campaign events and see how specific posts coincide with pricing data over time.

For instance, 'How did my Facebook Post impact over 1hr? 3hrs?' This timeline representations of social marketing campaigns & their respective impact in community reach and prices may prove invaluable to your team's strategy.

Heat Map

Understand peak hours for your community with this 7-day heat map. Each hour of the past week is visually color-coded to reveal engagement patterns. Learn what days of the week and when will be most effective & engaging for your next announcement. Also, reveal when's the best time to stealth launch a network event.

Community Manager

Allocate responsible parties to read messages, respond to questions, and interact with your community for 24hr coverage with this time & work assignment tool. Requires your organization to provide "read" access for our system's Telegram &/or Discord bots.

ERC20 Contract

Transaction Analytics

Monitor token launches, visualize transaction counts, and observe patterns on your blockchain. Analyzing this activity paints a picture of how your smart contract value maps to your campaign efforts.

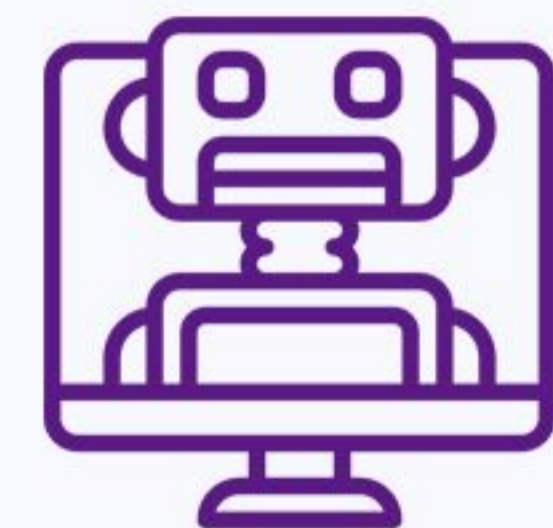

Exchange Statistics

Visualize all major public exchange information with aggregated price & volume charts. Learn how to get listed on additional exchanges.

BOT Configurator

Our telegram/discord bot offers configurable welcoming methods & messages, spam control, in-chat price & token info commands. Requires your organization to provide admin rights to our Telegram &/or Discord bots.
