

CUSTOM SMART CONTRACTS & BLOCKCHAIN DEVELOPMENT SERVICE

DAPP Development

Decentralized Application Development in Ethereum, HyperLedger Blockchains, EOS & more.

TokenMagic is your reliable and expert technology partner for blockchain based decentralized software solutions.. We offer a custom tailored service based on your specific project needs.Our experts will advise you throughout development on critical decisions related to blockchain platform selection and technology stacks.

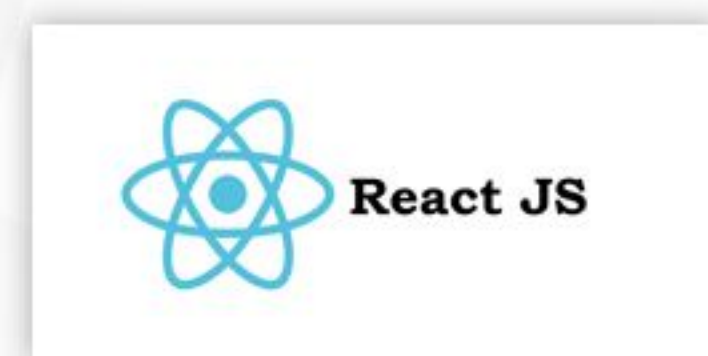

IBM HYPER LEDGER FABRIC

HyperLedger blockchain with IBM Fabric framework offers companies ability to build enterprise tlevel blockchain applications with their choice between private and/or public data storage. TokenMagic offers custom decentralized application development using IBM HyperLedger fabric.

ETHEREUM BLOCKCHAIN

The Ethereum blockchain has revolutionized business models through the use of tokenized dApps and smart contracts. TokenMagic can develop complex smart contracts and dApps on both the public and private Ethereum blockchain for startups & corporations.

TOSHI APP DEVELOPMENT - WEB3 JS INTEGRATION

ICO SERVICES

Smart Contract Development

We develop custom ERC20 smart contracts to fit your ICO funding strategy and your ERC20 token contract that can be seamlessly upgraded..

TokenMagic ICO Cockpit

Our ICO clients will get access to our proprietary ICO management platform to manage various actions in their Pre-Sale & Crowdsale smart contracts. Through the TokenMagic ICO Cockpit, our clients can change critical features of their ICO smart contract without ever writing a line of code.

ICO SMART CONTRACT AUDIT SERVICE

The TokenMagic Solidity Development team provides smart contract audit service by evaluating your smart contract code repository to ensure your code is free from material errors which could result in serious loss.
